SECTION 4: FIRST AID MEASURES

EYE CONTACT :

Remove contact lenses at once. Immediately flush eyes with large quantities of water for at least 15 minutes. Get medical attention.

SKIN CONTACT:

If contact with molten product occurs, treat as for thermal burn. Do not try to peel molten polymer from the skin. Get medical attention promptly.

INHALATION :

Not likely to be inhaled due to physical form. For processing fume inhalation irritation, leave contaminated area and breathe fresh air. If coughing, difficult breathing or any other symptoms develop, get medical attention.

INGESTION :

Not a likely route of exposure. If person is conscious, give large amounts of water to drink. Induce vomiting. Get medical attention.

SECTION 5: FIRE FIGHTING MEASURES

FIRE FIGHTING :

Water spray is the preferred extinguishing medium. Use water spray to cool fire exposed surfaces, protect personnel, and extinguish the fire. Respiratory and eye protections are required for fire fighting personnel.

EXTINGUISHING MEDIA :

Water spray and foam. Carbon dioxide and dry chemical are not generally recommended because their lack of cooling capacity may permit re-ignition.

HAZARDOUS COMBUSTION PRODUCTS :

Combustion products may include intense heat and high levels of black smoke containing, carbon monoxide, carbon dioxide. Formation of traces of aliphatic and aromatic hydrocarbons, aldehyde, acids, phenol and phenol derivatives may occur.

FLASH POINT : Not applicable

LOWER FLAMMABLE LIMIT : Not established

UPPER FLAMMABLE LIMIT : Not established

AUTOIGNITION TEMPERATURE : 550 °C <

SECTION 6: ACCIDENTAL RELEASE MEASURES

GENERAL :

Sweep or gather up product and place in proper container for disposal or recovery. Don't exit to sewers and waterways, because fish may eat pellets and obstruct their digestive tracts.

SECTION 7: HANDLING AND STORAGE

HANDLING :

Prevent contact with skin and eyes. Use good industrial hygiene practices. Provide adequate ventilation. If product is powder and transported with air, make explosion relief provision.

STORAGE :

Store in a dry place away from moisture, excessive heat and sources of ignition.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

OSHA regulation 29CFR1910.1000 :

5 mg/m³(respirable dust), and 15mg/m³(total dust) based on OSHA PEL for nuisance dust.

ACGIH TLV :

A TWA of 10 mg/m³ (total dust) for nuisance dust.

VENTILATION :

A continuous supply of fresh air to the workplace together with removal of processing fumes through exhaust systems is recommended. Processing fumes may contain small amounts of carbon dioxide, diphenyl-carbonate, phenol and substituted phenols. Ventilation requirements must be locally determined to limit exposure to materials at their point of use.

PERSONAL PROTECTION

SKIN : No precaution other than clean body-covering clothing should be needed.

EYE : Safety glasses should be sufficient for most operations; however, for dusty operations or when handling solutions of the material, wear chemical goggles.
